DRAFT - NOT FOR ENTRY

AMENDMENTS TO THE CLAIMS

1. (Currently amended) A method for processing data comprising:

receiving as inputs a plurality of records, each record comprising respective ^{first and second} ~~entries~~ data that have been entered in a first field and in a second field;

processing the respective data from at least some of the records so as to find a relation between the ~~entries~~ data that have been entered in the first and second

fields in the at least some of the records; ^{which are the first and second} ~~data are different from one another~~

selecting for verification one ^{of the records} ~~of the records~~ comprising first and second entries in the first and second fields, respectively; and

comparing the first and second entries to the relation in order to verify the first and second entries.
